EDUCATION

Sabancı University — Istanbul, Turkey
(BSCS) Computer Science and Engineering (Senior) — Expected Graduation: June 2027
Minor Program in Business Analytics · 50% Merit-Based Scholarship · Dean's List High Honors

Jordanian International School — Amman, Jordan
High School Diploma — Graduated: June 2023

The International School of Choueifat — Riyadh, Saudi Arabia
Primary and Middle School

EXPERIENCE

Sabancı University - PURE Program — Istanbul, Turkey
Undergraduate Researcher — Sep 2026 - Jan 2027
- Conduct undergraduate research on “Advancements of AI in Surveys,” including literature review, methodology development, analysis, and academic reporting.

Sabancı University - CS201 Programming Fundamentals — Istanbul, Turkey
Learning Assistant (LA) — Sep 2026 - Jan 2027
- Support CS201 students with programming fundamentals, exercises, problem solving, and debugging during course activities.

EastNets — Amman, Jordan
Data Scientist Intern - Anti-Money Laundering (AML) — Jun 2026 - Sep 2026
- Worked end-to-end on an Anti-Money Laundering detection model, from raw transaction data to a deployable classifier.
- Performed data cleaning, preprocessing, and feature engineering in Python (Pandas, NumPy) on transactional datasets.
- Built and evaluated classification models for high-risk transactions, tuning precision/recall trade-offs for compliance.

Freelance - Software Development, AI Services & AI Content Creation
Software Developer & AI Services / Content Creator — Jun 2026 - Present
- Built websites, mobile apps, backend systems, APIs, and AI-powered solutions for freelance clients.
- Provide workflow automation, chatbot development, AI integrations, and custom software solutions.
- Create AI-generated videos, social media creatives, and marketing assets for clients.

TechChef (SAP Analytics Cloud Team) — Amman, Jordan
Data Analyst and Custom Widget Developer Intern — Jun 2025 - Aug 2025
- Built custom SAC widgets using JavaScript, HTML, and CSS.
- Delivered two production-ready widgets independently and received a recommendation letter.

SELECTED PROJECTS

DialectGuard - Arabic NLP & Trustworthy LLM Research
Independent Research Project — Oct 2026 - Nov 2026
- Evaluated Arabic LLM factual reliability across four Arabic varieties in 4,020 experimental runs; completed an unpublished manuscript documenting the methodology, findings, and limitations.

Multimodal AI for Early Cybersickness Prediction in AR/VR
Graduation Research Project — Sep 2026 - Present
- Developing ML methods using multimodal VR data, including network traffic and user movement, to predict cybersickness early and improve AR/VR user experience.
- Preparing research toward a possible SİU 2027 conference submission.

FactTrace - Mobile Claim Verification Application
Mobile Application Project — Sep 2026 - Jan 2027
- Developed a camera-based application using OCR and curated evidence retrieval to assess claim provenance.
- Designed source review and user-led verification; compared accuracy, time, source use, and sharing intention.

DiCo-NLI - Directional-Consistent Natural Language Inference
Natural Language Processing Project — Sep 2026 - Jan 2027
- Developed NLP pipelines for fine-grained inference and directional consistency across sentence pairs.
- Prepared datasets and preprocessing workflows; implemented classification baselines for model evaluation.

SneakerNest - Full-Stack E-Commerce Platform
Software Engineering Project — Jan 2025 - May 2025
- Built a scalable e-commerce system using React, Node.js, Express.js, MySQL, and Docker.
- Designed secure REST APIs and database schema while leading sprint planning as Scrum Master.

SU Learning Companion - Mobile App for Sabancı University
Mobile Application Project — Sep 2025 - Jan 2026
- Developed a cross-platform mobile app using Flutter, Dart, and Firebase as a Project Coordinator.
- Built to help students stay organized with course tracking, reminders, flashcards, and productivity tools.

AI for Accessibility - iOS Navigation App
Mobile Application Project Jan 2025 - May 2025
• Developed an iOS app in Swift for visually impaired users.
• Integrated YOLO-based object detection, audio feedback, and gesture controls using CoreML and Xcode.

Data Science Research - Unemployment & Crime in the U.S.
Data Science Project Feb 2025 - May 2025
• Performed EDA, hypothesis testing, and statistical modeling in Python.
• Built Random Forest and Linear Regression models; project selected as a sample reference for future courses.

VOLUNTEER WORK & ACTIVITIES

Sabancı University Civic Involvement Projects - Environment Care	Oct 2023 - Jan 2024
Model United Nations (MUN) - Jordanian International School	Sep 2021 - Jun 2023
Professional Football Player - Gothia Cup, Dana Cup, Jordanian Youth League	2018 - 2023

SKILLS

Technical: Python, C++, JavaScript, TypeScript, SQL, HTML, CSS, React.js, React Native, Expo, Node.js, Express.js, Flutter, Dart, Swift, Java, MySQL, REST APIs, Machine Learning, Deep Learning, NLP, LLM Evaluation, Retrieval-Augmented Generation (RAG), OCR, PyTorch, scikit-learn, TF-IDF, YOLO, CoreML, Google Cloud Vision, Git/GitHub, Docker Compose, JIRA, Firebase, Databases, Figma.
BI / Analytics: SAP Analytics Cloud (custom widget development), Matplotlib, Seaborn, Pandas, NumPy, Data Analysis, Statistical Modeling.
Interpersonal: Adaptability, Leadership, Organization, Presentation, Teamwork, Time Management.
Languages: English (Fluent), Arabic (Native), Turkish (Elementary).

CERTIFICATES

- JavaScript Mastery - JS Mastery (Sep 2024)
- Anthropic: Claude 101; Claude with API (Jun 2026)
- Anthropic: Claude with Amazon Bedrock (Jun 2026)
- Anthropic: MCP Advanced Topics (Jun 2026)
- Anthropic: Intro to Agent Skills (Jun 2026)
- Complete Web Development Bootcamp - Udemy (Feb 2025)
- Anthropic: Claude Code 101; Claude Code in Action (Jun 2026)
- Anthropic: Intro to Model Context Protocol (Jun 2026)
- Anthropic: Intro to Subagents (Jun 2026)
- Anthropic: AI Fluency: Capabilities & Limitations (Jun 2026)
